Experiment 4: Mobile Network Protocol Stack

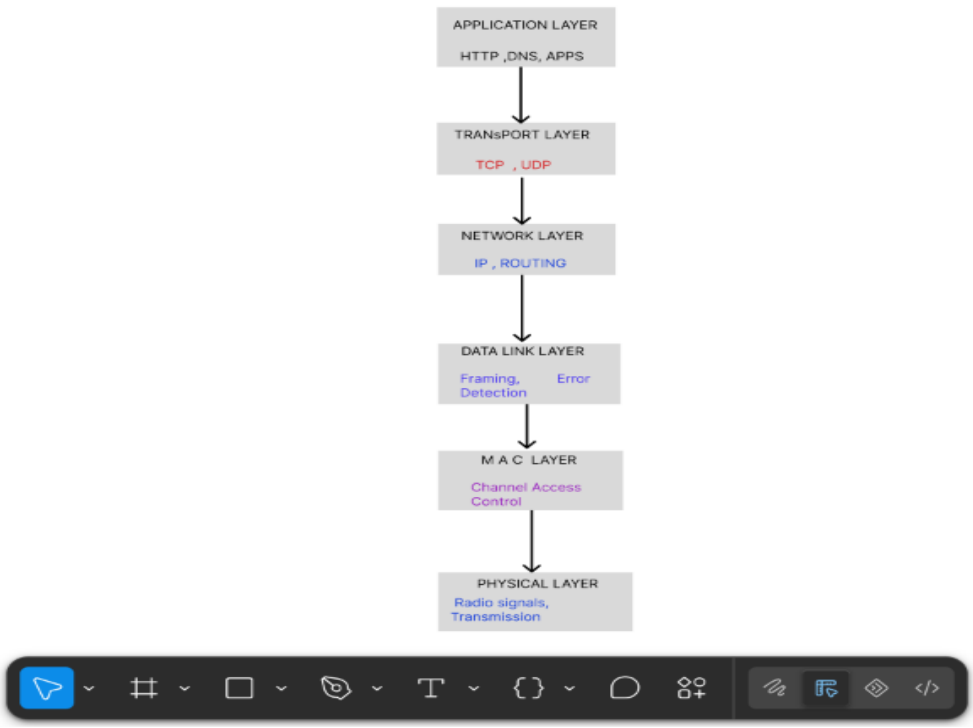

Aim:

To create a visual representation in Figma highlighting the key elements of mobile network protocol stacks.

Algorithm:

1. Open Figma and create a new design file.
2. Create a frame and add the title "Mobile Network Protocol Stack".
3. Draw six rectangles representing the protocol layers.
4. Add the names: Application, Transport, Network, Data Link, MAC and Physical Layer.
5. Add important protocols and functions to each layer.
6. Connect all layers using arrows.
7. Apply different colours to each layer.
8. Save and export the design as a PNG image.

Output:

Result:

The mobile network protocol stack was successfully designed in Figma, illustrating the six layers, their functions and communication flow.
